

Perspectives on World Energy and Power

Clean Energy Research Centre Seminar Series

Speaker: Stan Ridley (P.Eng., C.Eng., MICE)

Stan has more than 38 years of experience and expertise in the Energy and Power fields. He has worked as a senior executive for a Crown Corporation, and major international private sector engineering companies, on projects in five Continents. Stan brings clear and deep perceptions and insightful views to these vitally critical subjects.

There are many leading specialists that have a very bleak view of our future on the planet; to quote the recently deceased Dr. Courtland Mackenzie, MD, "Technology is the big thing that has come along and helped us destroy the planet very quickly. It will be a long time before the last breeding pair of humans dies, but I think they're gonna have a tough time ... in this century." (Globe and Mail 2012 interview). Stan is much more optimistic that we humans have the intelligence and ingenuity to find realistic solutions before it is too late.

FREE ADMISSION

Monday, September 23, 2013 3:00 – 4:30 pm
Introduction with reference to critical CO2 worldwide challenges, conventional fossil fuels, and conversion systems

Monday, September 30, 2013 3:00 – 4:30 pm
Alternative and renewable sources, conversion systems, political and social perspectives, decision analyses, summary, and possible ways forward.

Location:
Chemical & Biological Engineering Building
Room 102, 2360 East Mall, UBC Vancouver campus.
